1. Presentation

In order to meet the high demand of the world economy and tourism, which were immensely harmed in the face of the COVID-19 pandemic, the Trip Finance Token (TRIP) appears, contributing and using the importance of finance decentralization.

We are proudly presenting you TRIP FINANCE TOKEN with a mission to provide incredible possibilities with a safe investment and able to unify continents through a single currency, a single token, making easy and scalable payment through the Binance Smart Chain smart network. It is also possible to obtain gains in the appreciation of a single currency, in addition to discounts through tax savings imposed by the traditional monetary system.

TRIP is a BEP20 Token with a smart contract for generating liquidity and income that provides for automatic burns in each transaction and that will bring benefits through a wallet that will provide raffles. It is a new generation of autonomous and frictionless cultivation protocols. It was created with the vision of creating a thriving community of like-minded investors in travel, tourism, business payments, rentals, lodging, and other businesses that benefit this sector.

TRIP FINANCE TOKEN has the main objective of revolutionizing the sector by facilitating payments and seeking better ways of saving with reduced values through partnerships and integrations without bureaucracy. We want an automated market.

TRIP was built on the pillar of active use in global and local tourism networks for travel and business in the near future. The TRIP TOKEN FINANCE Project is expected to become a worldwide B2C travel and tourism network where members are holders and companies can come together and benefit from each other as global and local tourism service providers in light of past travellers' experiences and shares, make bookings and sales with cryptocurrencies and earning crypto money from your bookings and sharing valuable content through NFT, CEX and DEX.

TRIP was produced to eliminate the high costs of high volume domestic and international money transfers and the complexity of Swift transactions in tourism and travel transactions, even for business. Tourism is one of the largest industries in the world economy, currently shaken and weakened by the COVID-19 pandemic. One of its main objectives is to eliminate the complexity and difficulty arising from the use of local currency in countries.

TRIP is the near-future tourism and business cryptocurrency that can be used securely in all countries of the world from your cryptocurrency wallet, eliminating the need to carry cash or debit cards.

2. What is decentralized finance?

The biggest advantage of decentralization in finance is to dissipate centralizing entities in the operational aspect and in the storage of values. In the conventional financial system, even if users coordinate loans through cooperatives, there is a person/a mechanism that controls amounts, fees, among others.

In summary, decentralized finance (DeFi) allows its users to carry out value transactions through programmable digital contracts, without the possibility of intervention or censorship by third parties. Everything is properly registered on a public blockchain, in a distributed database, that is, without risk of manipulation.

3. What is Trip token?

Token, in English, means token or symbol. In the area of technology, the name refers to an electronic device/system that generates passwords widely used by banks.

In the cryptocurrency universe, however, the word gains another definition. In short, it means the digital representation of an asset – money, property and investment, for example – on a blockchain. Blockchain is the name of the distributed ledger technology (DLT) that was born along with Bitcoin (BTC) in late 2008. In short, it is a large ledger that records transactions between people (peer- to-peer, P2P), without an intermediary.

TRIP is a TOKEN built on the BEP20 (BINANCE SMART CHAIN) network, the first-tier blockchain of cryptocurrency exchange Binance, which recently announced a major rebrand and a push into scalability, according to a press release shared with CoinDesk.

TRIP TOKEN was initially conceived with a circulating supply of 10 billion units with fixed firing planning to reduce circulating quantities, benefiting our holders.

4. VALUES

Transparency

We practice transparency between developers and holders, in order to ratify the credibility of our investors. We believe that transparency and credibility are fundamental pillars for the success of TRIP.

Trust

Trust is indispensable in the financial market. Therefore, we spare no effort to maintain transparency in the development and security applications of TRIP so that our holders continue to trust our token.

Longevity

We created a RoadMap with numerous possibilities for gains and a long-term planning and development, aiming at the gain and satisfaction of our holders.

Community

We believe that together we can go further and we are working so that we can reach everyone around the world.

5. TRIP TOKEN Mission

TRIP FINANCE TOKEN was designed to facilitate the daily life of the user, from its use in routine transfers, restaurants, shops in general, rentals, to travel, accommodation, flights, among other means of transport, ensuring the validity of transactions through blockchain technology and encryption.

TRIP TOKEN wants to benefit its Holders by decreasing the amount in circulation of the coin to promote sharp appreciation by attracting more and more attention to the token. We aim to create benefits and sweepstakes for our holders using parts of the fees implemented in TRIP TOKEN transactions.

It is important to note that TRIP wants to be a high-yield currency for its holders and therefore aims to attract investors who envision a promising future using TRIP as an exchange rate and enjoying its benefits.

6. TRIP TOKEN Utilities

TRIP will be a Payment Token

A Payment token is used to transfer capital, functioning as electronic money. Bitcoin, Ethereum and most of the more than 10,000 cryptocurrencies on the market fall into this category. And TRIP brings this objective to facilitate payments for travelers at any stage and objective, even on business trips or in a routine use in a restaurant.

TRIP will be Utility token

Utility tokens offer some utilities, such as a discount on a specific product or access to an exclusive service. Fan tokens, digital assets of football clubs, are examples, as they benefit fans with exclusive access, voting rights, exclusive events, travel, events and tours for token holders. TRIP TOKEN aims to provide exclusive benefits at VIP locations, private events, unique discounts in all sectors, experiences in differentiated environments, in-flight facilities, exclusive promotions, sweepstakes and boarding conveniences.

TRIP NFT (Non-fungible tokens)

Non-fungible tokens (NFT) - or non-fungible tokens - are tokens that represent something unique. They can “mirror” artwork, music, historic magazine covers, and even tweets. When purchasing an NFT, the person basically buys a computer code that contains the object's record. This unique record will be used to revive and recreate postcards, which were collectibles and which represented true works of art, involving several artists with their artworks that represented countries.

The purpose of the NFT is to generate a store and promote free trade for currency circulation and its usefulness by promoting advertising and attracting new investors. In this way, it can benefit holders, people who are interested in creating their NFT for sale, for example photographs, creating connections between countries.

TRIP wants to be a Decentralized Exchange

A DEX, as it may be called, is an exchange that allows users to trade cryptocurrencies with each other (peer-to-peer) without intermediaries. On this platform, everything is controlled by algorithms and smart contracts. They are different from centralized exchanges, which have a team and a company in control, as is the case with Mercado Bitcoin and Binance, for example. Two examples of DEX are Uniswap (UNI), over the ETHEREUM network and PancakeSwap (CAKE), over the SMART CHAIN network.

TRIP will come to Centralized Exchanges

Centralized Exchanges (CEX), are the traditional cryptocurrency exchanges, in which, today, most of the trading volume is. On centralized platforms, the user relinquishes custody of their funds, leaving them deposited on the platform. In addition, centralized exchanges offer banking gateway services, allowing users to purchase cryptocurrencies with fiat currency by debit/credit card or transfer. Because it is more convenient and because it outsources the risk of custody, it is necessary that contracts are made in order to expand the use and volume of the TRIP token, and reach worldwide exchanges. It will be a challenge, but possible.

An intent - Security token

A Security token represents some real estate value, such as a stock traded on the Stock Exchange. As they are “linked” to regulated products, they must comply with the rules of capital market supervisors. This could become a reality as Token manages to attract real estate investors by expanding possibilities in the hospitality industry.

Case study for the application of TRIP TOKEN in the world market

7. Trip Pay

Trip Token will be a single payment currency that can be sold in any commercial establishment or company dedicated to the tourism sector or intermediary in the sector.

Trip Pay will be an integration method where those interested in receiving Token Trip in their sales will be able to contact the team to carry out the implementations.

Interested partners will be able to analyze possible integrations by modules and plugins for frameworks such as Wordpress and Magento through Woocommerce or another application.

The cryptocurrency market has facilitated the payment methods and transactions that are virtually instantaneous and with lower fees. In this way, the Trip Token partner will be able to choose to receive in the P2P modality in their sales, providing more economic values to their customers.

Trip Token will seek integrations into cryptocurrency Visa and Mastercard cards by Crypto.com.

8. Case study for the application of TRIP TOKEN in the world market

COVID-19 impact on tourism could cost global economy US\$4 trillion, ONU warns

- The global damage caused by the COVID-19 pandemic to tourism could reach 4 trillion dollars, estimate the World Tourism Organization (WTO) and the United Nations Conference on Trade and Development (UNCTAD).
- The estimate is based on the losses caused by the direct impact of the pandemic on tourism and the ripple effect on related sectors.
- Developing countries have suffered the most from the impact of the pandemic on tourism, with estimated arrival reductions of between 60% and 80%.
- The report highlights that unequal vaccination magnifies economic damage in the developing world, which can account for up to 60% of global GDP losses.
- In 2020 alone, the drop in tourist activities resulted in a \$2.4 trillion economic blow. The United Nations World Tourism Organization (UNWTO) has published a report on the impact of the COVID-19 pandemic on tourism. The damage could reach \$4 trillion, with a recovery expected only in 2023, according to the United Nations Conference on Trade and Development (UNCTAD). In the analysis, the coronavirus vaccination process plays an essential role.
- The estimate is based on the losses caused by the direct impact of the pandemic on tourism and the ripple effect on related sectors, which is worse than previously expected. Last July, UNCTAD estimated that the shutdown of international tourism would cost the global economy between 1.2 and 3.3 trillion dollars.
- The sharp drop in tourist arrivals around the world in 2020 resulted in a \$2.4 trillion economic blow, the report said, and a similar number is expected this year, depending on the rollout of COVID-19 vaccines.
- Global Vaccination Plan - "The world needs a global vaccination effort that protects workers, lessens adverse social effects and makes strategic decisions regarding tourism, taking into account possible structural changes," said the acting Secretary General from UNCTAD, Isabelle Durant.
- "Tourism is a lifeline for millions, and advancing vaccination to protect communities and support the safe restart of tourism is critical to restoring jobs and generating much-needed

resources.especialmente nos países em desenvolvimento, muitos which are highly dependent on international tourism” added UNWTO Secretary General Zurab Pololikashvili.

- Hard-hit countries - International tourist arrivals dropped by about 1 billion, or 73%, last year, while in the first quarter of 2021 the drop was about 88%, the report said. Developing countries have suffered the most from the impact of the pandemic on tourism, with estimated arrival reductions of between 60% and 80%.
- They were also harmed by the inequity of the vaccine. The agencies said the “asymmetric deployment” of COVID-19 vaccines has amplified the economic downturn for the tourism sector in these nations, as they can account for up to 60% of global GDP losses.
- Recovery amid losses - Tourism is expected to recover faster in countries with high vaccination rates, such as France, Germany, the United Kingdom and the United States.
- However, international tourist arrivals will not return to pre-pandemic levels until 2023 or later. This is due to barriers such as travel restrictions, slow virus containment, low traveler confidence and a poor economic environment.
- While a tourism recovery is anticipated in the second half of this year, the report predicts a loss of between \$1.7 and \$2.4 trillion in 2021, based on simulations that exclude stimulus programs and similar policies.
- Likely Outcomes - The authors outline three possible scenarios for the tourism sector this year, with the most pessimistic reflecting a 75% reduction in international arrivals.
- This scenario shows a drop in global tourism receipts of nearly 950 billion dollars, which would cause a loss in real GDP of 2.4 trillion dollars, while the second reflects a 63% reduction in international tourist arrivals.
- The third considers variable rates of domestic and regional tourism. This assumes a 75% reduction in tourism in countries where vaccination rates are low and a 37% reduction in countries with relatively high vaccination levels, mainly developed countries and some smaller economies.

Tourism loses \$2 trillion in 2021 because of the pandemic

- Tourism sector will end the year 2021 with losses of US\$ 2 trillion due to the coronavirus pandemic. In a survey, presented this Monday, the World Tourism Organization, WTO, reveals that the recovery of the sector is “fragile” and “slow”.
- 29 November 2021
- A survey by the World Tourism Organization, WTO, shows that the sector's recovery is slow and fragile; travel may continue to be affected by new strains of the coronavirus and tourist arrivals are still 75% lower than in 2019.
- Last year, the sector had similar economic losses, being one of the hardest hit by the impacts of the global health crisis. Despite recent improvements, the flow of travel continues to be affected by uneven vaccination rates between countries and new variants of Covid-19, which generate more travel restrictions.
- The sector is also being affected by the rise in fuel prices. According to the UNWTO, international tourist arrivals in 2021 continue to be 75% lower than in 2019, before the pandemic.
- UNWTO Secretary-General Zurab Pololikashvili said the data for the third quarter of 2021 are “encouraging”, but at the same time “the results between different regions of the globe remain uneven”.
- According to him, the increase in cases and the emergence of another variant, “it is not yet the time to let our guard down”, but “to continue the effort to guarantee equal access to vaccines, coordinate travel procedures, use digital certificates of vaccination to facilitate the movement of people and support the sector” of tourism.
- Southern Europe, the Mediterranean, the Caribbean, North America and Central America were the regions that received more tourists in 2021 than last year.
- But arrivals in Asia and the Pacific were 95% down on 2019 numbers as many countries continued to have borders closed to non-essential travel. In the Middle East, the drop was 81% and in Africa, 74%.
- Between July and September of this year, the countries that had the strongest recovery in tourism were Croatia, Mexico and Turkey, as well as the Caribbean, according to the UNWTO.

- The agency's report also highlights that the European Union's Digital Covid Certificate facilitated the movement of people within the countries of the bloc.
- The future of the travel industry is the focus of the UNWTO General Assembly, which is taking place in Geneva until Friday, with representatives from 159 countries.

9. TRIP FINANCE TOKEN Solutions - PARTNERSHIP AND INTEGRATION INTENTIONS

Partner Program: disclosure, loyalty plan, discounts, access to VIP areas and payment methods through API or directly with partners to accept TRIP Tokens INTERCONTINENTAL, such as:

- TRIP ADVISOR
- CVC
- ROYAL CARIBBEAN
- HOTEL NETWORKS
- AIRLINES LATAM, TAP, AIR FRANCE, GOL AMONG OTHERS
- HURB
- TOURISM AGENCIES
- E-COMMERCE
- COMMERCIAL ESTABLISHMENTS AND ONLINE STORES

Online Store: An online store where travel packages or tourism products will be sold that will be retailed with cryptocurrency. This store may be through Market Place and online partners.

Integration with online payment platforms such as: VISA, MASTERCARD, WOOCOMERCE, MAGENTO, OPENCART, BITPAY, PAYPAL AMONG OTHERS

Online Store: NFT sales in consolidated Market Place allowing customers to sell their Postcards in NFT form.

DEX: In order to facilitate the transaction of our token, we will endeavor to add a secure platform to our website for exchanging your coins. Our decentralized exchange will operate through the BEP-20 network.

Loyalty programs: Points and loyalty program to give benefits to holders and buyers who use TRIP TOKEN

Use in CriptoBank: Use in worldwide payment cards such as Visa and Mastercard consolidating partnerships. Alsoqueremos listagem na Crypto.com para podermos fazer com que TRIP TOKEN seja utilizado como pagamento em seus cartões visa.

Periodic Raffles: With the aim of always benefiting our Holders, we will periodically raffle travel packages that will be widely publicized on

our channels and purchased with our partners for holders who have over 300,000 TOKENS TRIP.

TRIP FINANCE TOKEN WANTS TO WORK AS A COMPANY CROSSING CONTINENTS AND CONNECTING PLACES THROUGH CRYPTOGRAPHY

10. Fees and Tokenomics - SIMPLE FUNCTIONS - INITIAL
SUPPLY 1.000.000.000

CONTRACT: 0x17bFC58C5da13ace280a7Ecd6EaC932Ffd40C059
NAME: TRIP FINANCE TOKEN
DECIMAL PLACES: 8
ACRONYM: TRIP
NETWORK: BEP20

PURCHASE FEE 7%

1% BURN
1% LP
3% USDT REFLECTION
2% MARKETING

AIMING AT THE LONGEVITY OF THE TOKEN AND THE BENEFIT OF HOLDERS WHO BELIEVE IN THE EXPANSION POTENTIAL OF TRIP IN THE MARKET, SALES FEES HAVE BEEN STIPULATED SO THAT WE CAN MAKE THE TOKEN PROVIDE EARNINGS OVER TIME AND ALLOW ENOUGH TIME TO PROMOTE AND PRESENT MORE WORKS DEMONSTRATING NEW INVESTORS AS WELL AS NEW PARTNERS THAT TRIP IS SOMETHING LONG AND CAME TO BE AMONG THE BIGGEST CRYPTO ON THE MARKET.

IT HAS BEEN DECIDED THAT THE REDUCTION OF THE SALES RATE WILL BE CARRIED OUT IN A GRADATIVE AND PROPORTIONAL WAY FOR A CERTAIN TIME, GENERATING MORE SOLIDITY FOR THE ASSET. IN THIS WAY WE DEMONSTRATE TO OUR HOLDERS/PARTNERS THAT WE WANT THE HEALTH OF THE ASSET FOR EXTRAORDINARY GAINS THROUGHOUT THE LIFE OF THE TOKEN

SALE RATE FOR THE FIRST 30 DAYS AFTER LAUNCH WILL BE 21%

1% BURN
2% LP
5% USDT REFLECTION
4% TRIP PORTFOLIO (DRAW/BURNS)
9% MARKETING AND PARTNERSHIPS

SALE RATE FROM THE 2nd MONTH TO THE END OF THE 3rd MONTH
WILL BE 15%

1% BURN
2% LP
4% USDT REFLECTION
8% MARKETING AND PARTNERSHIPS

SALE FEE 10% FROM THE 4TH MONTH

1% BURN
2% LP
3% USDT REFLECTION
4% MARKETING AND PARTNERSHIPS

TRIP WILL BE A PORTFOLIO DESIGNED TO ACCUMULATE FUNDS
TO PERIODICALLY DRAW EXCLUSIVE PACKAGES TO HOLDERS AND
SCHEDULED BURNS

The rules on the draw stipulated as the disclosures of the draws occur (includes the draw rule, on the availability of packages, disclosure of the result and participation of Holders who have over 300,000 TOKENS on their benefit)

TOKEN BURNS: AFTER THE RELEASE, IT WILL BE DEFINED WITH THE COMMUNITY ABOUT THE FIRST TOKEN BURNS - SCHEDULED BURNS WILL BE DISCLOSED IN ADVANCE
INITIALLY THE FIRST BURN IS BEING SET AT 3,000,000.

TOKENOMIC SUMMARY

As mentioned earlier, our token has a smart contract for automatic liquidity generation, burns and an accumulation for drawing among the holders of packages and benefits to their holders. Initially, a slightly higher rate was decided on the sale in the first 3 months aiming at the longevity of the TOKEN and to attract holders who think about the future with high gains.

As it is a business focus, TRIP TOKEN does not want to attract holders who think about daily trading, removing all liquidity from our asset. We will need time to consolidate the coin and attract more holders with future high earning instincts who will benefit from believing in \$TRIP.

SUPPLY TOTAL 1.000.000.000		
15,00%	150000000	Pre Sale: 15%
30,00%	300000000	Initial Burn: 30%
9,50%	95000000	Dev - locked: 9.50%
18,50%	185000000	Future partnerships / Burns
4,60%	46000000	Marketing: 4.60%
22,40%	224000000	liquidez pancake 22,40%

11. About Pre-sale

CONTRATO 0x9b09D900DE2212D622d3dD77A9FCf92A97aDe775

The Pre-sale will be initiated through a purchase with a smart contract with the payment method in BNB

1 BNB = 300,000 (THREE HUNDRED THOUSAND TOKENS)

1 Token = \$0.0012

To benefit initial investors, the TRIP TOKEN Team has set two initial goals:

GOAL 1 - If the Pre-sale reaches 300 BNB, the Token will be released with the value: 1 Token = \$0.0017

GOAL 2 - If the Pre Sale exceeds 300 BNB, the Token will be released with the value: 1 Token = \$0.0020

Any amount that is not sold in the Pre Sale will be burned before the official launch of the Token.

12. ROADMAP

Phase 1 - Q2/22

- Website creation
- Creation of Social Networks
- Telegram Communities
- Launch Marketing
- Whitepaper development
- Pre-sale (5k Holders)
- Launch on PancakeSWAP
- 5k Holders
- Dessert Finance Audit
- Marketing at poocoin

Phase 2 - Q3/22

NOTE: Listing on coinmarketcap and coingecko
(These platforms are overloaded and we ask for your understanding, but rest assured that this is the main focus that will happen from phase 1)
1) The team is very interested in this publication urgently to present very seriously the work and potential of Token

- Commercial partnerships to receive the Token and purchase products from future sweepstakes
- Partnerships for payment integration
- sweepstakes rules
- 7k Holders
- Structuring TOKEN as a Company
- Website integration development
- Marketing at poocoin

Phase 3 - Q4/22

- Start of TRIP FINANCE SWAP Development
- 10,000 Telegram members
- 10k Holders
- Draw rules and date settings
- (Possibility of the first big draw)
- Listing in Exchanges
- CERTIK Audit
- expand marketing
- Site V2 - Sale of tourist packages
- TRIP Company Consolidation
- angel investors

Phase 4 - Q1/23

- Listing in Exchanges
- sweepstakes
- Commercial partnerships for reselling packages
- Sales website expansion
- Integration in payment modules
- Training and incentives for START UP TRIP
- More works will be presented....

SUMMARY OF PHASES

We are working to create and launch a Token that will bring benefits such as payments, sweepstakes, discounts in all travel sectors involving vacations and business.

We have a long way to go because TRIP has a worldwide scope and the possibilities of using this TOKEN are infinite and requires time and hard work and therefore the intention to evolve into a START UP.

13. Important - THE CONTRACT WILL NOT BE WAIVED

The team intends to present itself as a company that will seek applications and utility for the TRIP Token that will become a useful currency in need of constant management.

TRIP TOKEN FINANCE intends to follow the field of cryptography through TOKEN TRIP and act in the future as a startup in the decentralized travel finance sector, integrating countries, businesses and people.

We do not waive the contract because it is a project with a long-term projection term, where if you need improvement and improvements to the TOKEN, as well as burns for price adjustments and improvements, we will be able to act on behalf of the community. In addition, several projects nowadays face problems with the coins for having waived the contract; This justifies and adds one more positive point for us not to renounce the contract.

USE OF THE TOKEN FOR PURCHASES

Another big reason for not giving up the same is due to the idea of creating a utility for the token as a form of payment. Therefore, reaching the future stages, we are studying the possibility of introducing and using \$TRIP in our SWAP or as a payment method for the NFT market, travel, cruises and online payments at travel agencies.

And with that, maybe it will be necessary for some platform to be itself, or any other has access to the source code of our token for integrations on different platforms. For these and other reasons we have made the decision not to waive the \$TRIP contract

CAUTION - RISK WARNING

TRIP TOKEN is currently in the early stages of development and there are a variety of unforeseen risks in project design and launch.

You must acknowledge and agree that there are a number of risks associated with the crypto world and particularly with acquiring TRIPs, holding TRIPs in your Wallet and using TRIPs to participate in any trades. In the worst case scenario, this can lead to the total or partial loss of your TRIP TOKEN.

IF YOU DECIDE TO PURCHASE TRIP ANY STAGE, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THAT:

ALL RISKS RELEASE THE ENTIRE TEAM FROM ANY RESPONSIBILITY FROM FAILURES OR ADVERSE PROBLEMS RELATED TO THE FINANCIAL WORLD, NATURAL DISASTERS, TECHNOLOGY FAILURES AND YOU UNDERSTAND THAT POSSIBLE CHANGES TO THE ROADMAP FOR THE GOOD OF THE PROJECT AND COMMUNITY MAY BE NECESSARY FOR THE TRIP PROJECT ACHIEVEMENT AND SUCCESS FINANCE TOKEN

The Team is committed to the launch of TOKEN and also to a massive work for the execution and fulfillment of the ROADMAP with a view to the success of TRIP TOKEN FINANCE

THE TEAM WILL GIVE FULL SUPPORT FOR POSSIBLE PROBLEM SOLUTIONS AND ADVICE TO HOLDERS.

The team will be committed to new solutions that support the vital purpose of the project, which is to become a reference in decentralized finance for travel and business.

WE AIM FOR A STRONG COMMUNITY THAT WILL ALWAYS PROSPER

14. DISCLAIMER

The team is not responsible for the purchase or sale made by you in cryptocurrency. Please do your due diligence by consulting your financial advisor before making any investments and making any decisions. By purchasing TRIP TOKEN, you agree that you are NOT purchasing with a guarantee or return on investment. You also agree that the team is NOT responsible for any losses or the like that may occur. The team does not guarantee compliance with any country in the world. Always be sure to comply with local rules, laws and regulations before making any purchases.

INFORMATION PUBLISHED ON WHITE PAPER

DISCLAIMERS

The white paper provides information and material of a general nature. You are not authorized and neither are you obliged to rely on the white paper for business advice, advice, or advice of any kind.

You act at your own risk!

You must decide for yourself whether to act or not to act! The owners, developers, team of project or contributors, are not responsible in any way for the actions, decisions, attitudes or other behavior taken or not taken by you based on the information.

INVESTMENT RISKS

The team is not responsible at any time for the purchase or sale made by you of the cryptocurrency. Do your due diligence in consulting your financial advisor before making any investments and making any decisions. By purchasing TRIP you agree that you are NOT purchasing with a guarantee or return on investment.

You also agree that the team is NOT responsible for any losses or the like that may occur. You also agree that the team is presenting the token "as is" and it is not necessary to provide any support or service.

The team does not guarantee compliance with any country in the world. Always be sure to comply with your local laws and regulations before making any purchases.

NO WARRANTIES

The whitepaper is provided “as is”. There are no guarantees of return of any kind, with respect to the whitepaper and/or any other content, data, materials and/or services provided.

FUTURE STATEMENTS

There may be matters in this white paper that are forward-looking statements. Such statements are subject to risk and uncertainty. Participants are cautioned not to place undue reliance on these looking at statements.

Actual results or events that happen afterwards may differ from what is implied here. The team does not guarantee the accuracy of the forward-looking statements described here and/or any other content, websites, data, materials.

LIMITATION OF LIABILITY

Unless otherwise required by law, the owners, staff or contributors will not be liable for any damages of any kind, including, loss of use, loss of profit or loss of data arising therefrom.

We don't want shallow investors, we need investors who understand economics and know that the company needs time to work and deliver the best service!

THANK YOU - MORE NEWS COMING SOON
